

Session title:

Public and private sustainability initiatives, in and beyond supply chains, to promote greater inclusion of smallholders and SMEs

Organized by:

**D. Andrew Wardell &
Michael Brady,**
CIFOR-ICRAF

**05 May
2022**

**09.30 - 11.00 am
(GMT+9)**

**COEX, Seoul
Republic of
Korea**

The multiplication of sustainability initiatives has been driven by the growing complexity and diversity of conditions under which agri-food and timber supply chains operate. They involve many different types of actors who can all have an indirect influence on land-use decisions. There is, typically, a lack of articulation between the different initiatives.

Broad interest in Voluntary Sustainability Standards has been accompanied by other private governance regulations such as codes of conduct, principles and guidelines, moratoria and wider commitments to sustainability. More recent steps include the adoption of public and private commitments to Zero Deforestation as a way of responding to consumer pressure

on deforestation-free supply chains.¹ Nevertheless, the latest Forest 500 report indicates that no palm oil, soy, cattle or timber company that has committed to eliminate deforestation from their supply chains by 2020 will meet this goal. This panel explores some of the many challenges to implementing public and private sustainability initiatives using four case studies, viz.

¹ See, for example, the French national strategy to reduce imported deforestation, 2018-2030 (https://www.ecologique-solidaire.gouv.fr/sites/default/files/2018.11.14_SNDI_0.pdf) and the Consumer Goods Forum Forest Positive Coalition of Action launched in Paris on 22 September 2020 (<https://www.tropicalforestalliance.org/en/news-and-events/news/partner-news-new-consumer-goods-coalition-to-accelerate-systemic-effort-to-remove-deforestation-and-forest-degradation-from-key-commodity-supply-chains>)

Public and private sustainability initiatives, in and beyond supply chains, to promote greater inclusion of smallholders and SMEs

05 May 2022 | COEX, Seoul, Republic of Korea

XV WORLD
FORESTRY CONGRESS

Michael Brady

Forest Stewardship Council (FSC) New Approaches Program to promote greater smallholder engagement in S.E. Asia

Guillaume Lescuyer

Hybrid governance to ensure cocoa sustainability in Cameroon

Marie-Gabrielle Piketty

Municipal-level initiatives to halt deforestation in the Brazilian Amazon: Lessons for jurisdictional approaches

D. Andrew Wardell

The role of a national MSP – the Table Filière Karité – in securing greater inclusion of women shea (*Vitellaria paradoxa*) producers in agri-business and cosmetic value chains in Burkina Faso

Panel to be supported by
